

THE DANGERS OF RISKY BEHAVIOUR

How risky are your online activities?*

-  80% of people who view adult content and gamble online have been victims
-  Of the 66% of people who connect to free unsecured wifi, 77% have been victims
-  78% of people who lie about their identities or create fake profiles have been victims

That's 8 in every 10 people

* Figures from 24 countries surveyed in the 2013 Norton Report (www.za.norton.com/cybercrimereport)

Other high-risk activities include:

- Not using reputable anti-virus software
- Installing pirated software
- Using the same password for all your accounts
- Downloading illegal or copyrighted content

DID YOU KNOW?

STAYING SAFE

Use a reputable anti-virus program

Defend your data: encrypt and back it up

Get a tracking app if one is available for your device

Always scan external devices

Never share your password. Use unique passwords for all accounts

Beware of risky behaviour online

Treat your mobile as though it were a mini-computer

On all devices: Password. Backup. Anti-virus
