

UCT VPN

Connect securely to UCT's Virtual Private Network (VPN) from anywhere with internet access using AnyConnect. Enjoy convenient access to UCT network resources for remote work or study.

Benefits:

- **Enhanced Security:** Protect your data with certificates and authentication while accessing UCT's trusted systems over the public internet.
- **Flexible and Reliable:** Connect securely using any internet connection (fibre, ADSL, WiFi, 4G) for seamless access to UCT's network.
- **On-the-Go Access:** Work or study remotely with confidence by securely connecting to UCT's network from home or while traveling.

How to Connect:

Install AnyConnect: Download and install the AnyConnect client.
You can also access your work computer from a remote location via the VPN

To learn more about VPN, visit icts.uct.ac.za and search for **VPN**.
